

Railway Gazette China Edition

Published twice a year in Mandarin, Railway Gazette China Edition is produced to satisfy the demand for top-class information on the world's railway industry within China.

Now in its ninth year, and with more than 7,000 copies circulating among senior railway officials, Railway Gazette China edition has become established as a vital source of Chinese-language information on technical advances and international trends across the world's railway industry.

Top-class information for the Chinese railway industry

Editorial policy

Topics covered include all aspects of the rail industry including infrastructure, rolling stock, mainline, metro and freight, traction technology, signalling and passenger information systems.
